

**1969**

The U.S. DOT meets with the Manufacturing Chemists' Association (now the American Chemistry Council, Inc.) to determine the best approach for reporting and responding to emergency situations involving chemicals in transport.

**1985**

CHEMTREC adds foreign language translation for foreign shipments originating or terminating in the U.S.

**1971**

On September 5th, CHEMTREC becomes fully operational.

**1986**

TRANSCAER®, a national outreach program, is founded to assist communities and prepare responders for hazmat incidents.

**TRANSCAER®**

**2001**

On 9/11, CHEMTREC provides critical information to the New York Police Department's Hazardous Materials team as they evaluate the potential effect of chemicals contained in the collapse of the World Trade Center's twin towers.

**2004**

CHEMTREC launches medical information coverage as a service.

**2006**

CHEMTREC hosted the first International Emergency Response Summit in Miami, FL.

**2010**

CHEMTREC establishes the first global network of in-country telephone numbers.

**2017**

CHEMTREC launches SDS Direct, including SDS Access, Distribution, and Indexing.

**2020**

CHEMTREC offers CRITERION lithium battery test summary management service and partners with China's National Registration Center for Chemicals (NRCC) to create a unified global response for chemical emergencies in China.

**2022**

CHEMTREC's Incident Reporting service is introduced, including regulatory reporting for DOT form 5800.1.

CHEMTREC holds its third International Hazmat Summit in New Orleans, LA.

**1970**

MCA establishes CHEMTREC (CHEMical TRANsportation Emergency Center), to provide chemical-specific information to emergency responders around the clock.

**1978**

MCA becomes the Chemical Manufacturer's Association (CMA).

**1980**

**1988**

The CMA implements the Responsible Care program.

**1994**

CHEMTREC begins providing medical information support.

The U.S. DOT formally recognizes CHEMTREC as an approved source of information and advice relating to chemical and other hazardous materials incidents.

**2000**

CMA becomes the American Chemistry Council (ACC).

**2003**

CHEMTREC starts offering extended service protocols (ESP), including Worldwide Authorization.

**2009**

CHEMTREC develops industry solution for effective marking of lithium batteries in transportation.

**2014**

CHEMTREC extends its services to include global shipments (shipments to and/or from a country outside the U.S. to another country outside the U.S.).

**2019**

**2021**

CHEMTREC launches Crisis Solutions and SDS Authoring and celebrates 50 years of serving the chemical industry and emergency responder community!

CHEMTREC launches Online Hazmat Training and holds its second International Hazmat Summit in Houston, TX. The CHEMTREC HELP Award is established to help volunteer fire departments enhance their response capabilities to hazmat incidents.
